## Machine Learning and Statistical Modeling for Multi-Omics Training

Updated: Jan 4, 2024

The University of Turku coordinated the training, which targeted consortium members and close collaborators. The training gave participants an overview of analytical tools used for multi-omics studies in R, especially multi-omics tools and techniques required to process microbial community data together with other omics.

The event was held online on January 13<sup>th</sup> and 14<sup>th</sup>, 2022 with all training materials now available for download, [see the webpage](#) for more details.
